

# NAOS Emerging Opportunities Company (NCC)

NAOS

## MONTHLY INVESTMENT REPORT AND NTA UPDATE

January 2017

### KEY CHARACTERISTICS

#### 1. Genuine Exposure to Undervalued Emerging Companies

Regardless of market capitalisation and/or liquidity, NCC seeks to provide investors with exposure to high quality, undervalued emerging companies in a transparent and concentrated structure that has the competitive advantage of being a nimble closed ended fund with no liquidity constraints.

#### 2. Focus on Quality of Companies Not Quantity or Size of Companies

Our primary focus is on developing a deep understanding and appreciation of the companies in our portfolio. We believe the best way to achieve this is to focus on a select number (target 0-15) of high quality investment ideas. By developing a deep understanding of these companies we believe we are well positioned to capitalise on our 'long term information advantage' & 'liquidity advantage'.

#### 3. Focus on Meaningful Long Term Performance

We target an Internal Hurdle Rate of 20% p.a. over a rolling three-year period for all our investment holdings.

#### 4. Portfolio Constructed Utilising a Benchmark Unaware Approach

Being benchmark unaware means we are not forced holders of stocks with large benchmark weightings that we are not convinced are attractive investment propositions.

#### 5. Significant Alignment of Interests with Shareholders

NAOS & NCC employees/directors own >10 million NCC shares, providing shareholders with a significant alignment of interests.

### Investment Portfolio Performance to 31 January 2017 & Market Insight

\*\*A gentle reminder that NAOS will be holding our bi-annual investor roadshow presentations in Sydney, Melbourne, Brisbane, Adelaide and Canberra. The presentation is open to current and prospective shareholders. If you would like to attend please register your attendance at enquiries@naos.com.au.

For the month of January, the Investment Portfolio returned +0.08% which compared favourably to the Benchmark Small Ordinaries Accumulation Index (XSOAI) which fell by -2.44%. There were no notable events in the portfolio due to the holiday period and half yearly reporting just around the corner.

The ongoing theme of strong resource stocks and poorly performing industrials showed no signs of slowing in January. Within the ASX-300 the materials sector added +4.8% with some notable moves from Bluescope Steel (ASX: BSL) +20.8%, Fortescue Metals (ASX: FMG) +13.1% and Rio Tinto (ASX: RIO) +11.3%. On the other side of the ledger Consumer Services were led lower by a downgrade from Brambles (ASX: BXB) -16.0%. The Consumer Discretionary sector also continued its poor run with Myer (ASX: MYR) -12.3%.

Reporting season is an ideal time to highlight some of the key points that we will be focussing on within our portfolio of current investments. Firstly, in regards to BSA Group (ASX: BSA) the two most important aspects of the result will be the trend in EBITDA margins, and comments around the two NBN contracts regarding the levels of work completed relative to the expected size of the contracts.

Secondly, Armidale Investments (ASX: AIK) will release its first set of consolidated accounts as an operating entity as opposed to a Listed Investment Company (LIC). The key insights will be the cash flow generated from the broking businesses followed by the current size of the leasing book. We will also be looking for any comments on further consolidation within the broking finance industry as well as lead generation from the broking businesses to the leasing business.

Thirdly, MNF Group (ASX: MNF) will look to continue on their path of >20% earnings growth when they release their results in mid-February. The focus for the NAOS investment team will be commentary around global customer signups for managed service offerings from MNF, as well as commentary around the recent government contract wins and take up of these services. Finally, post the recent acquisition MNF still has significant financial resources to make another acquisition sooner rather than later.

	1 Month	6 Months	1 Year	2 Years (p.a.)	3 Years (p.a.)	Inception (p.a.)	Inception (nom.)
<b>NCC Investment Portfolio Performance*</b>	+0.08%	+11.53%	+41.22%	+19.42%	+16.74%	+21.51%	+114.99%

## A Description of Statistical Terms/Glossary

**Portfolio Average Market Capitalisation** – The portfolio weight of each individual position multiplied by each company's respective market capitalisation.

**Standard Deviation of Returns** – A historical analysis of the volatility in monthly returns also known as historical volatility.

**Correlation of Returns** – A statistical measure of how two variables move in relation to each other. In this case the two variables are NCC and XSOAI. If the correlation is 1 then the two securities should have the same monthly returns and if the correlation is -1 and XSOAI had a return of -1.00% then NCC would be expected to have a return of +1.00%

**Sortino Ratio** – A modification of the Sharpe ratio that differentiates harmful volatility from general volatility by taking into account the standard deviation of negative asset returns, called downside deviation. A large Sortino Ratio may potentially indicate that there is a low probability of a large capital loss. Returns less than that of the benchmark (Small Ordinaries Accumulation Index - XSOAI) are classified as negative asset returns.

**Downside Deviation** - A measure of downside risk that focuses on returns that fall below a minimum threshold or minimum acceptable return (MAR). For our calculations, we use returns negative to zero for the calculation of portfolio downside deviation.

**Portfolio Beta** – A measure of the volatility, or systematic risk of a portfolio or security. A beta of 1 indicates a portfolio/security's price will move with the market. A beta of less than 1 indicated that a security/portfolio should be less volatile than the market.

**XSOAI** – Small Ordinaries Accumulation Index
